

# Environment Policy

At Thorburn Australia we believe in the finite quantity of resources the Earth's ecosystem provides.

We will strive to ensure all our products, projects and internal systems account for this fact and design all our work around this fundamental principle.

Where possible, we will recycle, reuse and re-invent practices, applying our engineering expertise to provide sustainable outcomes with regards to energy, air, water and soil.

We shall actively promote and encourage the adoption of ecologically sustainable work practices and operations within our organisation, with our clients, suppliers and the general community.

This policy is endorsed by the company Director on 10 June 2011.
