PROCESS CONTROL

Thorburn Australia engineers love automation and control system projects!

With professional programmers and real world process control experience, we believe our capabilities are second to none.

From providing slick, user friendly operator interfaces to hard core complex control algorithms we can do it all.

We have experience in a wide range of control systems for chemical plant, power, water, waste water and material handling applications.

Thorburn Australia are system integrators for Schneider and Rockwell and have the tools for all types of systems including:

- Quantum, M580, TSX, 984, 484
- AB Logix, SLC5, PLC5
- Siemens S5, S7
- Citect, ClearSCADA
- Miri, Kingfisher, SCADAPacks
- System 6, Infi-90, Conductor

We can design, build, integrate, commission and optimise your entire process control system.
